sale premises.

### INSURANCE

All bulls remaining at JPM Farms must be insured. Three levels of insurance are  
offered. KT Agencies Larry Toner (306) 834 7652 will be on site sale day.

# WELCOME

Welcome

We would like to welcome you to our 6th annual bull and female sale. We can't believe it has been 6 years since we first gathered on a -30-degree day in February for our first sale...somehow it seems so much longer. Thank you for trusting us with your breeding bulls. We are privileged to share in the success of your herd.

There is only one way to build a herd; from the ground up. We have worked hard, toured countless herds, and culled aggressively to put together a herd of cows that reflect that direction. We have invested heavily in walking sires with outstanding pedigrees that Inject power and performance with exceptional maternal Angus characteristics.

These bulls and females were raised in the conditions they will have to perform; big fields, with lots of travel. They were weaned in mid-September and fed a diet high in roughage, a mineral pellet, and S01 Oats.

We would like to welcome Jimmy Henderson and Lee Crowley to our list of sales consultants. Both of these, gentlemen know cattle inside out and are there to assist you in any way possible. We would like to invite you to tour the cows and see the siblings and dams of the cattle on offer anytime. We hope to see you on sale day or bid with confidence on DLMS.

JP and Marlene

306-648-7935

# THE POWERFUL GENOMIC SELECTION TOOL

Brought to you by the Canadian Angus Association and Angus Genetics Inc.

**ANGUS**GS  
Powered by Neogen Canada

## FOR ANGUS. BY ANGUS.

Angus GS™ sets the standard in genetic testing for Angus cattle.

- More power
- More accuracy
- More value

Angus GS testing is an investment that some Canadian Angus breeders make to enhance the information available to their customers. Genomic technology, specifically the Angus GS genomic test which was created for and by Angus specifically, contributes to:

1. More accurate EPDs, particularly on younger, unproven animals, and
2. EPDs for traits that are difficult or expensive to measure like tenderness, marbling, docility, foot angle, claw set, and feed efficiency.

**TEST INCLUDES PARENT VERIFICATION**

**ANGUS**GS  
Powered by Neogen Canada

# GENOMIC PERCENTILE RANKS DEFINITION OF TRAITS

## Calving Ease Direct (CED)

Is an indicator of an animal's genetic potential for unassisted births in first-calf heifers. Animals in the top 20th percentile of the breed indicate more direct calf calving ease than animals in the bottom 80th percentile.

## Birth Weight (BW)

Measures genetic potential for calf weight at birth. Animals in the top 20th percentile of the breed indicate lighter birth weight calves than animals in the bottom 80th percentile.

## Weaning Weight (WW)

Is a measure of genetic potential for calf weight at weaning. Animals in the top 20th percentile of the breed indicate more pounds of weaning growth than animals in the bottom 80th percentile.

## Yearling Weight (YW)

Describes an animal's potential for calf weight at one year of age. Animals in the top 20th percentile of the breed indicate more pounds of post weaning growth than animals in the bottom 80th percentile.

## Yearling Height (YH)

Characterizes an animal's genetic potential for height or frame. Animals in the top 20th percentile of the breed indicate larger frame size than animals in the bottom 80th percentile.

## Mature Weight (MW)

Is an expression of genetic potential for mature cow weight at six years of age. Animals in the top 20th percentile of the breed indicate larger cow size in pounds than animals in the bottom 80th percentile.

## Mature Height (MH)

Characterizes the genetic potential for mature cow height at six years of age. Animals in the top 20th percentile of the breed indicate larger cow size in frame or hip height than animals in the bottom 80th percentile.

## Calving Ease Maternal (CEM)

Characterizes an animal's potential for unassisted births in first-calf daughters. Animals in the top 20th percentile of the breed indicate fewer assisted births in first calf heifers than animals in the bottom 80th percentile.

## Milk (MILK)

Is a measure of milk and mothering ability as expressed in daughters. Animals in the top 20th percentile of the breed indicate more pounds of weaning weight in calves through the dam's milking and maternal ability than animals in the bottom 80th percentile.

## Scrotal Circumference (SC)

Is a measure of genetic potential for scrotal circumference, a predictor of bull fertility. Animals in the top 20th percentile of the breed indicate more yearling scrotal size than animals in the bottom 80th percentile.

## Docility (DOC)

Is an animal's genetic potential to be extremely calm, or to have calm offspring. Animals in the top 20th percentile of the breed indicate more docile animals than animals in the bottom 80th percentile.

## Heifer Pregnancy Rate (HP)

Is used as a tool to increase the chance of a sire's daughters becoming pregnant during a

normal breeding season. Animals in the top 20th percentile of the breed indicate more probability of daughters becoming pregnant at first exposure than animals in the bottom 80th percentile.

## Carcass Weight (CW)

Is a genetic predictor of hot carcass weight as measured at harvest time. Animals in the top 20th percentile of the breed indicate more pounds expressed than animals in the bottom 80th percentile.

## Fat Thickness (FAT)

Is a predictor of the differences in external fat thickness as measured between the 12th and 13th carcass ribs. Animals in the top 20th percentile of the breed indicate less back fat cover than animals in the bottom 80th percentile.

## Ribeye Area (REA)

Characterizes an animal's genetic potential for ribeye area. Animals in the top 20th percentile of the breed indicate more ribeye area than animals in the bottom 80th percentile.

## Marbling (MARB)

Is an expression of the potential to improve marbling score, which is used to predict Quality Grade in beef cattle. Animals in the top 20th percentile of the breed indicate more marbling and greater potential to grade AAA than animals in the bottom 80th percentile.

## Tenderness (TND)

Represents the genetic potential for tenderness as measured by the Warner Bratzler shear force test. Animals in the top 20th percentile of the breed indicate more tenderness than animals in the bottom 80th percentile.

**2023 CANADIAN COMMITMENT TO EXCELLENCE  
IN RECOGNITION AND APPRECIATION OF  
OUTSTANDING PERFORMANCE**

We were humbled and thankful to be nominated for this award by the Canadian Angus Association Board of Directors and Ducks Unlimited. Thank you. It truly was an honor for our family.

Coalition stamps his progeny with his good hip, correct structure and expressive muscle shape. Sons are solid performing, good looking bulls with modest birth weights. Daughters are consistent in their type - fancy fronted with depth of body, length, big hip and perfect teat size and positioning. They are some of the most sought after breeding females in the Angus industry. The cows behind Coalition are outstanding. His dam and granddam are highly productive females with progeny weaning ratios of 4/113 and 6/113! Coalition was a good-footed sire with a remarkable disposition.

## FLUSH MATES Lots 10 & 11

What a way to start the bull portion of our 2024 Sale! The Coalition cross on the old PVA Blackcap A184 donor was a fantastic mating. Purebred quality herd sires.... What a unique combination of outstanding maternal traits. Excellent feet, docility and performance, and carcass traits with a very modest birthweight.

Ellingson Open Range was a top selling bull in Ellingson's 2022 production sale from the first calf crop of Ellingson Rangeland. Open Range 1035 will improve overall maternal qualities, structural integrity, fertility, and calving ease with extra performance. He is a direct son of EA Bells Girl 2181, the iconic donor that was the 'Pick of the Herd' in 2020, selected by Ingram Angus. There are five full sisters to Open Range retained in the Ellingson donor program. At the 2021 sale, a maternal sister, EA Bells Girl 7617 produced the Lot 1 top selling Ellingson Badlands 0285 which sold for \$80,000. This pathfinder dam has also produced Preeminent, Progressive, Elite and Brickhouse. A true testament to her maternal excellence, Open Range has proved himself to be a calving ease sire mostly because of his phenotype. Smooth shouldered with that beautiful next extension, he really stamps them. Used heavily in 2023 in the Ellingson program, we share ownership with EA. We are offering CSS semen for sale on Open Range. Please inquire.

We are excited to offer these Three Forks bulls and females in this year's sale. Ellingson Three Forks 0252 was the #1 weaning and yearling weight bull from the 2021 EA Production Sale and our \$32,000 selection. Top 1% in WW, YW, CW MW and MH. Three Forks was the natural born March calf of cornerstone donor EA Queen Dolly 3246, earning a 112 weaning weigh index at 1030 lbs. EA Queen Dolly 3246 is an ideal Angus female that we have seen on several occasions and we jumped on the opportunity to incorporate her into our program. Three Forks maternal brothers include the \$110,000 Ellingson Rider Pride, Blockade and Fortified. Owned with Ellingson Angus.

Musgrave Aviator was the top selling bull of the 2013 sale at \$77,000. He was a tremendous individual; high volumed, very thick and eye-appealing. Hailed the heaviest quartered calving-ease prospect ever produced from Musgrave's herd. Aviator has established himself as a calving ease sire with a nice phenotype and excellent feet. He stood for many years at Origen bull stud where he was admired by many.

Perfectly balanced, the daughters off Rito 320J are correct just like this bull. Not much to change about this big fellow.

### Reference Sire JPM 9969 Rito 320J

JPM 9969 Rito 320J bull was shown at Agribition and led off our pen of three. Very complete and sound with a real herd bull presence. Smooth shouldered with a nice neck extension; he has a big round foot with tremendous heel depth. There isn't much to change on this bull. A son of the PVA Blackcap A184 donor that has produced so many great offspring. Top 4% in the Angus breed in 7 genomic traits. YW, Scrotal, Hoof Angle, Carcass Weight, Rib Eye, Fat and Mature Weight.

We are pleased to present our newest herd sire in 2024. Welcome Ellingson Profile! We toured the bulls at EA in December of 2023 and said "OK, find your top picks and we'll compare notes after"... little did we know we had both selected the Lot 2 bull in this year's sale. From the 6409 pathfinder dam that produced the second high selling bull in the 2023 sale; Ellingson Navigator, came the Lots 1 and 2 Prolific sons. Lot 1 sold for \$295,000 and we were fortunate to partner with Nordal Angus on the Lot 2 Profile bull. An outcross to Open Range he has all the qualities we look for in a great herdsire. Phenomenal growth, excellent feet, high scrotal and superior phenotype with genomic dominance represent the thrilling potential and possibilities of what this young sire is capable of in the beef breed.

Top 1% in Weaning Weight, Yearling Weight, Claw, Angle, and Carcass Weight

We were fortunate to get time away to do some touring in the fall of 2023. We had not used SITZ Barricade in our program and were impressed with the females that we saw kept seeing at various herds. With Barricade semen relatively unavailable in Canada and with the bull deceased the opportunity to use his genetics were very limited. Rob Garner of Nordal Angus had selected a Barricade son from one of the most dominate female cow families in the US; Sitz Henrietta Pride Y2 at the 2023 Hoffman Angus sale. Stacked with maternal greatness and the phenotype that works we are thankful for the Garner family to allow us to purchase half interest in this great young sire.

Top 1% Angle and PAP. Top 2% in Claw

The Lewis 3043J Bravo son was the high selling black bull and our pick from the 2023 Lewis Farms bull sale. A moderate, extra-aged bull that did an excellent job covering cows in 2023. He is an out cross to all of our genetics. His first calves are on the ground and they are big topped, and well muscled with lots of hair.
